# APPAREL PILOT CLOTH

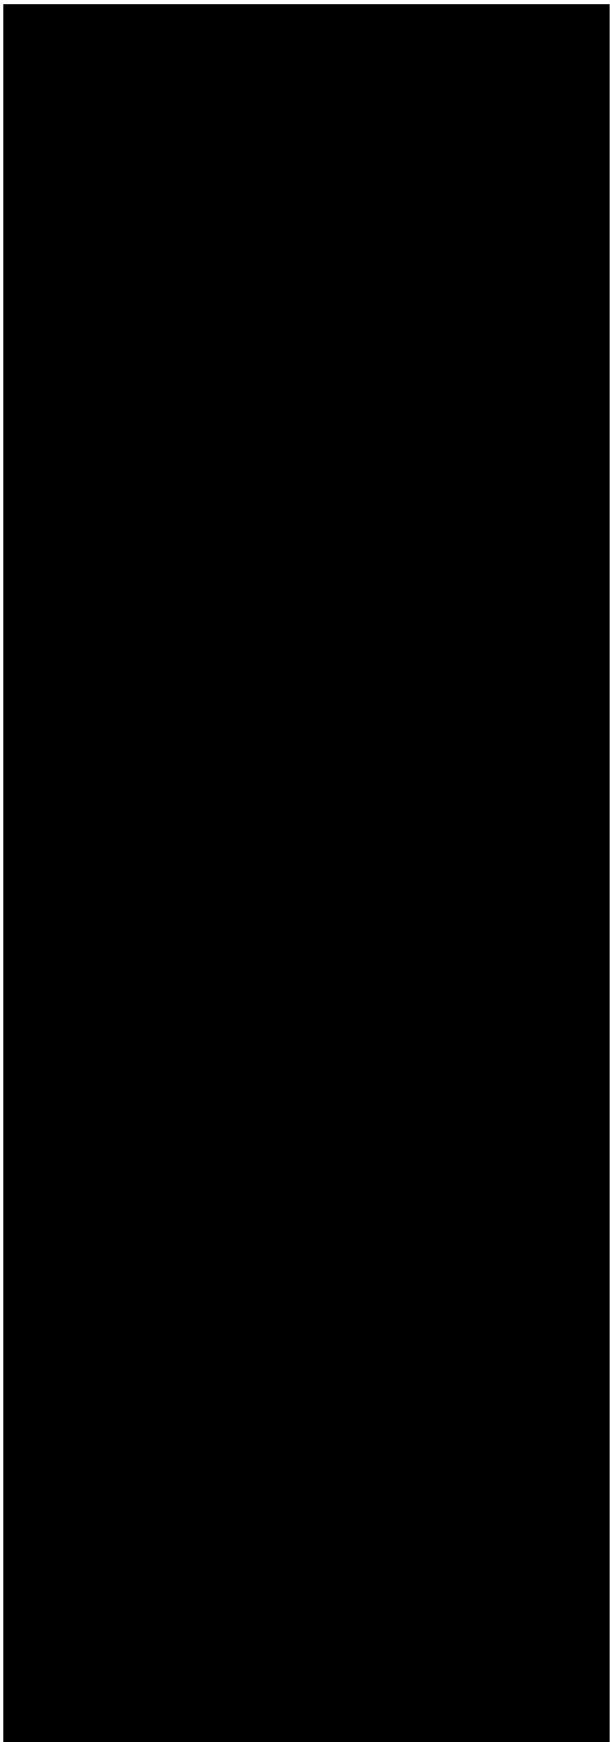

Pilot Cloth, with its vast historical character, is ideal for capes, duffles and other outerwear garments.

Traditionally made for jackets worn by sea men, the term 'pilot cloth' has often been shortened to 'p' cloth, hence the term p jacket or pea coat as a nautical term. Nowadays, the cloth lends itself to traditional outerwear and overcoating, due to its hardwearing and windproof properties.

Designed as a heavy weight option at 505gsm, Pilot Cloth is made from 100% wool with a 2/2 twill. Pilot Cloth is available in a range of traditional shades.
